- Core Skills: Vue, Node.Js, Express, JavaScript, TypeScript, MySQL, ReactJs, Tailwind, Vuex, Pinia, HTML, CSS, JQuery
- FrameWork, Tools and Technology: AWS, Git, GitLab, Docker, SQL, FireBase, Mongoose, Sequilize, ServerConfiguration, Vite, npm, Heroku, Rest API, npm, Xcode, JestLint, Prettier, Figma

Experience

The Virtual Gurus. (FullStack Engineer)

Calgary Feb 2021 - Now

- **Design and implementation of robust reporting system.** Including **automatic nightly jobs** to efficiently process internal data for generating interactive reports for non-technical stakeholders (Fullstack).
- **Refactored client checkout experience** (including post sign up process, user selecting services and completing payment). Handled communication with product team for required changes through having weekly meetings and translating requirements into the web app (Fullstack).
- **Improved the client subscription handling module.** Created new subscription, tightened up existing validation process and migrating the client invoice day to the subscription plans to increase flexibility for clients.
- **Integration with various 3rd party APIs on Backend:**
 - QuickBooks Online (QBO) integration for streamlined client and invoice management. HubSpot integration for automated ticket generation, form submissions, and contact updates while ensuring data accuracy.
- Skilled in authentication systems, role-based access control, and RESTful APIs.
- In charge of support live application in production and **investigating and resolving user facing bugs**.
- Develop UI modules using **Vue, tailwind**, JavaScript and Pinia and **converting Figma design** to responsive components and migrated web application to Tailwind framework to achieve **responsiveness** to match design requirements
- **Analyzed business requirements**, participated in technical design discussions, development and testing of various full stack modules.

Advertiise Inc. (FullStack Engineer)

Calgary Jan 2020 - Jan 2021

- Created a data monitoring administration panel using **Express, React and MongoDB**.
- Integrated the panel with 3rd party APIs to keep the data in sync between internal DB and 3rd party service.
- Leveraged **Jest FrameWork for testing**.
- Implemented **CI/CD pipeline using Gitlab and Heroku**.

Education

Master of Software Engineering

2017-2019

Beheshti University

Bachelor of Computer Science

2012-2017

Tehran University
